

**National Alliance for Public Charter Schools (NAPCS) Citation: Governor Mike DeWine Is A True Champion of Public Charter Schools**

Governor DeWine recently received the 2022 Champion for Charter Schools award from NAPCS. Ohio is being recognized for charter school advancement. The voucher crowd will no doubt award one or more state officials in Ohio for the advancement of vouchers since both charters and vouchers are both being proliferated in Ohio.

The Ohio charter schools industry is rife with fraud and corruption, profiteering and low performance; but state officials continue to reward the charter industry.

Ohio might be in line for an award for the most tax revenue being lost from charter closures, attendance rigging, and other forms of fraud and corruption, as well as lack of transparency and accountability.

State officials in Ohio should be perfecting the unconstitutional system of common schools, rather than investing in the privatization of public education. The Ohio Constitution could not be more clear--the state's responsibility is one thorough and efficient system of common schools; not multiple systems.
