The Anti-Public Good Privatization-Of-Education Gang Has Created A Political Trajectory That, If Not Halted By Litigation, Will Doom The Ohio Public Common School System.

There is a cluster of voucher zealots comprised of a small fraction of the Ohio population that is determined to destroy the constitutionally-required common school system. That gang is crusading to re-route the public tax dollars that belong to the public common school system to the parents of school-age children, thus to private schools.

The composition of the Ohio General Assembly foretells that the Universal Voucher program is imminent, unless there is judicial intervention.
