The Case of the 21st Century

A former Ohio Supreme Court Justice said the DeRolph school funding case was the case of the 20th century. The EdChoice voucher case will, in the future, be expressed as the case of the 21st century. Plaintiffs will prevail, which will pave the way to rid the law books of other unconstitutional school privatization programs in Ohio.

All school districts should get on the right side of history by joining the litigation effort.
