

### **SB368 Still Another Attempt to Establish a Universal Voucher Scheme**

The super majority Ohio Legislature is relentless in the goal of universal vouchers and thus defunding the public school system by appropriating education funds to individuals.

The state budget bill (HB110), effective July 1, 2021 greatly expanded the worth of vouchers and the eligibility for acquiring a voucher. HB290, the universal voucher bill, which would send funds to parents and not the public school system, was introduced May 11, 2021.

HB583, effective September 2022, expanded eligibility for vouchers.

Senate Bill 368, introduced in the current lame duck session, would make every student eligible for a voucher and give homeschoolers \$2000.

It matters not what public school boards, administrators, other public school personnel or advocates say, the veto-proof legislature will ratchet-up the stampede to education privatization.
