

**Auditor of State reports to the Ohio Senate regarding the Transparency of the use of Public Resources Survey (Harassment of School Treasurers and Intimidation of Members of the E&A Coalition/Vouchers Hurt Ohio)**

State Auditor Faber, in a June 16 report (attached) to members of the Ohio Senate, indicated the results of the “survey”.

In the third paragraph, the Auditor stated, “A survey was the quickest way for our office to gather and report on this information.” This is interesting because all of the data sought could have been found at the Coalition treasurer’s office on spreadsheets.

Further the Auditor states that the audit was conducted in the public interest. Right! The Senate President requested the “audit” in response to a subpoena served on him.
