

CC3604 8.31.23 Thursday

**Voucher proposal moving in Utah legislature even though Utah voters rejected a 2007 voucher law by referendum.**

Voucher zealots care not that a majority of citizens oppose the use of tax money for private education purposes. They peddle their wares in Statehouses across the nation.

The voucher cult sells its product by bashing the public common school system. State legislators, many of them addicted to the American Legislative Exchange Council (ALEC), seem to cower when the voucher lobby comes calling.
