Ohio's EdChoice voucher scheme supports economic and racial segregation with tax revenue.

Economic and racial segregation is being expanded by tax revenue being used to fund the EdChoice voucher scheme. State of Ohio voucher policy encourages segregation of racial and economic groups. Private schools select their students by virtue of tuition rates and school policies. Students have no legal right to enroll in private schools nor appeal if arbitrarily de-enrolled from private schools.

Most Ohio citizens are not aware that their tax revenue is being used to segregate student populations.
