

\$5 billion of taxpayer funds not audited.

The state has given \$5 billion of voucher money to private schools since 1997. Not one dime of that tax money has been subjected to a state audit.

What do private schools do with the voucher money? Bonuses for personnel? Parties? Trips to amusement parks? Replacement for private scholarship funds? The public does not know.

An Auditor of State once said he would follow a public tax dollar wherever it went. There are \$5 billion tax dollars that have not been followed. Do state taxpayers have a right to know how this pool of \$5 billion has been and is being spent?
