

**U.S. Senate Committee on Health, Education, Labor and Pension Report—By the Wealthy, for the Wealthy: The Coordinated Attacks on Public Education in the United States.**

The June 2024 June [report](#) from the U.S. Senate Committee mentioned in the title presents a sobering, solemn account of the nationwide attack on public education in America. The report focuses on voucher expansion. The specific Ohio narrative is on pages 9 and 10 of the report. One statement in the report that should startle Ohioans on page 9 is: “Ohio could more than triple its investment in career and technical education with the money it is instead spending on private school vouchers.”

So much for the “workforce” designation in the Ohio Department of Education (that was illegally transferred from the State Board of Education to the Governor’s office).
