

Coalition/Vouchers Hurt Ohio (VHO) membership is growing. The constitutional challenge to the EdChoice voucher scheme is moving forward deliberately.

More than 300 boards of education have contributed thus far to this most noble, consequential effort to keep the unaccountable and non-transparent EdChoice voucher scheme from destroying public education. Districts are joining the effort week by week. 24 new districts have joined in FY25.

The current administration's state budget proposal drastically reduces school district funding while dramatically expanding privatization programs. The current legislature leaders have signaled that they want tax money for private school building projects.

Membership in the Coalition/Vouchers Hurt Ohio increases weekly in part as a response to actions of the Governor and General Assembly.
